COACHING SPECIALIZATION

Finishing a learning journey and not feeling fully equipped for the outside reality isn't the best feeling in the world. We want to make sure you leave our certification with a robust toolbox that will enable you to tackle any challenges you may encounter.

For that purpose, we developed 4 modules during which we will explore specific tools for specific situations.

Although centred around a number of different specialties, the versatility of these tools allow you to feel confident at any stages of your coach development journey.

Coaching Specialties:

- Inclusion Coaching
- Wellbeing Coaching
- Confidence Coaching
- Other Specialties (i.e. Leadership, Productivity, Conflict...)

SELF-PACED LEARNING

As coaches, space for reflection and inner-thoughts is critical to our own development. Our self-paced learning allows you to spend time with yourself and define what is truly important to you - from where you want to go to what your coaching practice should look like.

Our instructors will foster an environment where you can design your own coaching model, define your own coaching niche, or even work on your business model.

LEARNING LABS

While learning about the theory is important, experiencing that new knowledge makes the whole difference.

During the learning labs, you become the coach, the coachee, and the observer all at once and all your senses become acutely aware of what coaching truly is.

Come prepared with your questions, push yourself outside of your comfort zone, learn from your peers, and harness your skills in an environment where you can feel safe and supported as your instructors hold your hand at every stage of the journey.

MENTOR COACHING

How do I know I am doing the right thing? That is definitely a question many aspiring coaches are asking themselves!

Mentor Coaching is what has helped each and everyone of us develop our skills in the right direction.

Mentor Coaching consists of coaching and feedback in a collaborative, appreciative and dialogued process based on observing a coaching session to increase the coach's capability in order for them to achieve and demonstrate the levels of coaching competency and capability demanded by the credential level.

We offer a mix of group mentor coaching and individual mentor coaching so you can not only learn from your peers but also focus on the areas of development that are specific to your needs and your unique way of being!

PEER COACHING

As a Coach Training Certification, our purpose is to ensure that YOU - aspiring coach - build the skills but also the confidence to go out in the real world fully equipped with the tools and the knowledge you need to be your best self!

Peer Coaching allows you to practice your coaching skills and exchange new ideas on coaching in a safe environment by meeting with your colleagues on a regular basis and implementing the tools and techniques you acquired during your learning journey.

By building up relationships with a diverse pool of coaches, you learn to adapt to different styles and develop the presence and flexibility needed to coach each individual and the unique personalities and topics they will bring with them.

CLIENT PRACTICE COACHING

In addition to coaching your peers, we give you the opportunity to practice the entire lifecycle of the coaching partnership by having your own coachees as early as possible.

Not only will you prepare yourself for being the coach you have always wanted but practicing with real clients also helps you to fine-tune who you wish to become as a coach by perfecting out your niche, your target audience, and even polishing the tools that represent you.

The added benefits? You even start building up the hours needed for becoming certified!
